Reds Stand Pat. Charge Allies With Stalling

Official Response Awaited
To Demand for Neutrality

TOKYO, Aug. 9 (Thursday) (AP)—The Communist top command played a waiting game on the interrupted Korean cease-fire talks today while accusing the United Nations of "stalling" tactics.

There still was no official response to Gen. Matthew B. Ridgway's Tuesday night demand for new Red assurances that the neutrality of Kaesong would be scrupulously observed.

The Peiping radio quoted a "special correspondent" as saying Gen. Ridgway's failure to send his delegates to Kaesong on such a "pretext" caused "the people of the world to doubt the basic sincerity of the American side." It was the first Communist reaction to Ridgway's message.

The broadcast complained that "the Korean armistice negotiations were suspended for another day as a result of the delegates of the American side failing without any justification, to come to Kaesong."

The Allied negotiating team waited for a signal to go ahead, but there was little likelihood of this today.

All Moscow papers gave a big play to the exchange of messages between the American president and Soviet president Nikolai Shvernik, and the U.S. Congress' resolution declaring Americans want friendly relations with the Russians.

Seaman Lost From Packer

COURTENAY, Aug. 8—Vancouver seaman Ivan Oriskovich, 49, was presumed drowned yesterday after he fell from the 106-foot packer Nootka Chief.

The ship was between Cape Lazo, seven miles from Comox, and Savary Island at the time.

Public Being Conditioned

Welter of Confusing Facts Obscure Reason for Increasing Milk Prices

The cost of milk is the news again. To explain the difference, the producer and distributor, who wants more money, and the public, who wants less, are at it again. Today presents the first in a series of articles on the subject by Lawrie Joslin, staff reporter.

By LAWRIE JOSLIN

In an age when special interests sometimes employ experts to prove black is white to gain a desired end, it is often difficult even to see a glimmer of truth through a network of twisted facts.

So many arguments are made continually by government, business and labor leaders to justify the never-ending spiral of living costs that the average man hardly has a chance to stop and think for himself.

Lately, for instance, a great deal has been said about production and distribution of milk.

PUBLIC CONDITIONED

It appears that the public is being conditioned for a new increase in the price of this vital food.

Distributors say costs are pushing them close to the point where they will lose money.

Producers claim higher labor and feed bills are forcing them out of business.

It may be that distributors are looking to the Milk Board as a means of getting a better profit, instead of devising and using more shrewd means of cutting overhead.

And it may be that producers are not thrifty enough to survive in what is yearly becoming a more competitive business. It may also be that the beef market is an easier way to make a good living.

Partly because Victoria is an island and milk must be shipped from the mainland to meet part of consumer demand, milk sells at higher prices here than it does in many other Canadian cities.

PRICE PICTURE

The picture right across Canada as it was in April of this year:

Victoria, 21 cents a quart for standard milk; Vancouver, 19 cents; Calgary, 19 cents; Regina, 18 cents; Winnipeg, 19 cents; Toronto, 20.5 cents; Montreal, 22.5 cents; Halifax, 19 cents.

In April, 1942, milk sold at 12

cents a quart in Victoria, so that the price has increased 75 per cent in the interval. Selling price in Vancouver was 10 cents in April, 1941, making the increase there 90 per cent.

INDEX UP 117 PER CENT

The food cost index went up 117 per cent in Canada during the same period.

In Vancouver the food index jumped 118 per cent. While no comparable figures can be obtained for Victoria, it is believed the percentage increase would be greater.

It can be assumed from these figures that milk has not risen in price at the same rate as other foods.

What makes another threatening increase in milk prices alarming, however, is that milk is a vital food, particularly for children.

The producer must pay his costs and take a reasonable profit out of 13 or 14 cents a quart. The distributor must do the same out of eight or nine cents a quart.

And it may be that producers are not thrifty enough to survive in what is yearly becoming a more competitive business. It may also be that the beef market is an easier way to make a good living.

Partly because Victoria is an island and milk must be shipped from the mainland to meet part of consumer demand, milk sells at higher prices here than it does in many other Canadian cities.

Jilted Lover Sought by Police After Ex-Fiancee Threatened

VANCOUVER, Aug. 8 (CP)—A Police said threats had been made against the life of Mrs. Jona Axdal, and her 33-year-old daughter, Lenore, a nurse, now with family friends in Winnipeg.

HEADING FOR VANCOUVER

The man is reported to have left Santa Monica, Calif., several days ago in a stolen truck, heading for Vancouver and the home of his former sweetheart. He did not know that she had fled to Winnipeg.

Details of the threat were contained in a wire from Sheriff E. F. Biscailuz of Los Angeles who warned: "Use caution. This man is dangerous."

He was described as a man determined to avenge the "insult" to his pride. The romance was broken—because of his "bad temper," family members said here.

A bill now in draft form before the House of Commons recommends equalized freight zones across Canada.

He is a young Canadian who met Miss Axdal in Santa Monica

last year. She was working as a nurse there.

STAYING IN WINNIPEG

The girl is staying at the home of Mr. and Mrs. Gunnar Eggertson in Winnipeg.

Mrs. Axdal's South Vancouver home was under police guard to day.

In Winnipeg, Mrs. A. G. Eggertson confirmed that Miss Axdal is in her charge but said she is "away for a few days." She indicated that police have been notified here. But police would not confirm whether the house is under guard.

Many dashed out of the crowds around the square and tried to rescue sacred objects from the main altar of the burning cathedral. It was the centre of ceremonies yesterday honoring the Saviour (Salvador), from whom both the country and its capital are named.

The clock in the cathedral tower struck four just before it tumbled down.

Firemen, handicapped by lack of water, confined the blaze to the theatre and cathedral square.

They saved the National University and the post office in the line-of the flames and also, the Bank of London branch building which at one time was surrounded by flames.

The initial flash enveloped cars parked in the square.

The cathedral was completed in 1888. It replaced an earlier structure destroyed in an earthquake that levelled most of San Salvador.

Another leader of the attack against the fire was Woodrow Wilson. "He was never without a saw or axe," Mr. Henderson said. "He has the strength of two men."

Police Seeking Two Gunmen

HOLLYWOOD, Aug. 8 (INS)—Police Chief William H. Parker disclosed today that two gunmen shot Tony Brancato and Tony Trombino in a gangland style slaying in Hollywood Monday night.

What's more, he wasn't using southern baked ham and candied yams for bait. Just a plain old-fashioned hucktail fly.

Phil and his party are guests of hotel manager George Walker, a "very good friend."

Phil is accompanied by a group of friends.

Alice Faye, his lovely screen star wife, will fly to meet him at Campbell River next Tuesday.

"We'll try our luck with some of the big ones there," he said last night.

One other pleasing feature of the Canadian scene is the Scotch "medicine" Phil takes along on the fishing trips: "just in case we catch cold."

BULLETIN

Call for Men

GRAND FORKS, B.C., Aug. 8 (CP)—A call went out from the fire line tonight for additional men as twin forest fires still burned out of control.

R.C.M.P. searched the streets for reinforcements for the 1,300 firemen.

Fire Razes

Cathedral

And Theatre

SAN SALVADOR, El Salvador, Aug. 8 (AP)—The Metropolitan Cathedral and the National Theatre were destroyed by a fire today that swept out of the theatre's film storage and across the main square of this Latin American capital.

First reports said 40 persons were injured in the theatre.

SPARKS ON FILM

The fire started in late afternoon, presumably when a short-circuited wire threw sparks on a movie film.

Many dashed out of the crowds around the square and tried to rescue sacred objects from the main altar of the burning cathedral. It was the centre of ceremonies yesterday honoring the Saviour (Salvador), from whom both the country and its capital are named.

The clock in the cathedral tower struck four just before it tumbled down.

Police Seeking Two Gunmen

ALLABOARD

By G. E. Mortimore

"Conservationists" is a long, dull word. An advertising man would throw it away immediately because it lacked punch. The word sounds like a blend of "conservative," "conservatory" and "conservationist," and it has little power to stir the feelings.

Power. There is a positive, dynamic word to awake the tingle and hearts jump.

Such is the foolish spell of words that "conservationists" sound as though they were standing still, trying to hold something and block progress.

To some people, the fight over the proposed damming of Buttle Lake is less interesting than a cricket match in British Honduras. They see it as a petty squabble between one group, called B.C. Power Commission and another called "conservationists," over a piece of water 150 miles from Victoria.

Some others favor power at all costs. Power turns wheels, makes jobs and dollars. These people don't care about fish, lakes or trees. They don't care whether the power is created by a company, a piggy bank known as a commission, or Joe Stain, as long as they get it.

I would say at a guess that the indifferent ones and the power fanatics are both in a minority, and both wrong.

This looks like a straight fight between the people and the bureaucracy. If the people lose this one, they can look forward to more defeats in the future.

I have heard it whispered that the current hearings are an empty gesture and that the commission holds a tacit license to dam Buttle Lake, whatever the people want.

There is not one fragment of proof for this assertion. But the mere fact that it is so said around bears a certain feeling of cynical despair among the common folk who are supposed to be the rulers of this province.

Do we control our public servants, or do they control us? The members of B.C. Power Commission are public servants. But in this matter we are apparently in danger of being run down by the machine we built.

Strathcona Park was set aside long ago for the enjoyment of the people forever. Now the power commission, which is also owned by the people, proposes to tear out and drown the heart of the park.

The only solid argument the commission has advanced so far is that it would be cheaper to dam Buttle Lake than to put a dam elsewhere and save the lake. They have not denied that a dam could be made elsewhere.

I suggest they know perfectly well that a dam could be made elsewhere. They are simply trying to pinch pennies to keep down the budget of their own little department. If they wreck an asset worth untold millions of dollars in the process, that means nothing to them.

However, I might be wrong on this point. The alternative dam on Upper Campbell may be impossible. If able engineers tell us so, and no other able engineers can contradict them after a proper survey, we shall have to believe their report. But there has been no such report.

Buttle Lake is a symbol of two larger struggles of the day. One is the constant struggle between industry and recreation. This is a struggle which must always end in a proper compromise. But the other fight is the people's fight to keep control of their own machinery of government. In this there can be no compromise.

The present hearings are being held before an appointed official who is undoubtedly an able man. But the burden of this decision is far too heavy for an appointed official to bear.

Protests against the proposed damming of Buttle Lake have poured in from scores of organizations representing thousands of citizens. This thing is so big that only the legislature should settle it. Any other course of action will create a grudge that will live for a long time.

Alexander Admitted As Chief

STANDOFF, Alta., Aug. 8 (CP) — Chief-Shot-Both-Sides put a feather bonnet on Viscount Alexander's head today and the Governor-General became Chief Pi-O-To-Kan of the blooded Indian tribe.

He smoked the pipe of peace and led off a ceremonial dance with Mrs. and Mrs. Alexander's white Indian chiefs and white honorary chieftains danced with Indian squaws.

In the same ceremony, the Viscount's sons, Shane, 16, and Brian, 12, were admitted to membership in the tribe as braves.

Pi-O-To-Kan means "Eagle Head." Shane's Indian name is "Many Fingers." Brian is "Eagle Speaker."

The initiation ceremony took place during the Bloods' annual sun dance at Standoff, 20 miles south of Macleod in southwestern Alberta. Present were hundreds of Indians of the tribe and other member tribes of the Blackfoot Confederacy.

MEMBERSHIP FILLED

Viscount Alexander has been patron of the honorary Kainai chieftainship since its formation in December, 1950. His induction fills the membership of 35.

The Governor-General was presented to Chief Shot-Both-Sides by Archdeacon S. H. Middleton, principal for many years of the Anglican residential schools for Indians at Cardston, Alta.

The old chief speaks no English. He spoke through Honorary Chief Percy Creighton in welcoming the Viscount.

Then, before the feathered-clad blood chiefs, he put on the Governor-General's feather headdress and E. R. McFarland of Lethbridge, president of the chieftainship, presented a Kainai scroll.

The boys were given gifts by Mike Eagle Speaker and Albert Many Fingers whose names they took.

Fred Rose Due For Release

OTTAWA, Aug. 8 (CP) — Two of the 20 men and women accused in Canada's sensational post-war spy probe will remain behind bars when Fred Rose is released shortly, possibly tomorrow, it was learned today.

Nine were imprisoned, one fined, nine acquitted and the charge against the other dropped.

Rose is the seventh to return from prison to freedom. The RCMP detained him in 1946.

Now 43, the Polish-born former Labor-Progressive member of parliament who was convicted of conspiring to communicate wartime secrets to Russia is due for release from St. Vincent de Paul penitentiary, near Montreal.

Oddities

CALGARY, Aug. 8 (CP) — Even the deer at the Calgary zoo have babysitters.

Curator Tom Baines says two mother Sika deer have worked out the system.

One mamma deer looks after both offspring in the morning. Mamma No. 2 takes over in the afternoon.

When neither wants to worry about the babies, they push the small fawn through a fence to be cared for by a neighboring elk. Then the mother Sikas trot off cheerfully together.

ST. PETERSBURG, Fla., Aug. 8 (CP) — Roasted possum and sweet potatoes are competing with high-priced meats on dinner tables hereabouts.

Two enterprising grocers, Sidney Harden and James Nelson, have started raising their own possums.

Says Nelson: "We sell 'em as fast as we can."

They get about \$1.50 for a plump, year-old possum weighing four or five pounds.

"Well-roasted, it tastes just like roast pork," Nelson says.

ESSO

GASOLINES

Fill your tank with "up-to-date" Esso or Esso Extra Gasolines. Take your car out on the road. See for yourself its better all-round performance.

Esso and Esso Extra Gasolines are continually being improved to give the best balanced combination of smooth flowing power, lively acceleration and protection against engine ping and vapor-lock. For more happy motoring, switch to Esso Gasolines and you're always ahead!

Curls Off, Ronnie's a Boy

Mrs. Nick Romanko of Edmonton always wanted a girl, and when she had two sons before being transformed, right, into she decided to bring up the younger, cheerful lad by application of clippers. (CP photo.)

Packed Into Foul Warehouse

Treatment of Ill Korean Evacuees Fans Blaze of Hatred Against U.N.

By BILL BOSS
Canadian Press Staff Writer

SEWON, Korea, Aug. 8 (CP) — Kan Kilsok sprang from the stinking fibre sacking that was his bed on the hospital floor.

He interrupted the conversation going on with the patient in the next "bed" — 33-year-old Chang Yong-Sik. Chang had been telling how he came to occupy his corner of the foul, open-ended warehouse that had been turned into a hospital.

He had been choosing his words carefully.

Infuriated by the near double talk, his neighbor exploded: "What he is trying to tell you is that we hate the United Nations."

"When we were turned out of our homes and hiding places the United Nations promised us food, and clothing, and medicine, and said accommodation was ready for us. Now we are treated like this. Koreans look after their animals better."

IMPROVISED

The angry Kang and feebly Chang were among more than 300 North Koreans in the hospital — improvised in emergency conditions by a Canadian Red Cross worker, Jack Purves of Cranbrook, B.C.

In a kidnap operation on a gigantic scale, the U.N. military command here has evacuated at least 120,000 North Koreans from their homes north of the 38th parallel.

Marshal Zhukov Chosen As Russian Eisenhower

LONDON, Aug. 8 (NANA) — He will command all-Russian and satellite forces in Central and Eastern Europe, and eventually, a German Red army.

The appointment, it is believed, heralds the setting up of a Russian counterpart of the North Atlantic Treaty. This may be done through a merger of the present Russian military agreements with each satellite into one giant treaty system, including "Red China."

Zhukov, who is 54, won fame as the savior of Moscow, Stalingrad, and Leningrad during the war. Stalin's right-hand man, he is regarded as one of Russia's greatest military leaders.

Zhukov, son of peasant parents, worked as a furrier in Moscow before joining the army. He has been married 28 years, and has two daughters. The only language he knows is Russian.

KONEV IN CHARGE

Under Zhukov, Marshal Ivan Konev is to be in charge of a Central European force covering Germany, Poland, and Czechoslovakia.

Zhukov, who is 54, won fame as the savior of Moscow, Stalingrad, and Leningrad during the war. Stalin's right-hand man, he is regarded as one of Russia's greatest military leaders.

Zhukov, son of peasant parents, worked as a furrier in Moscow before joining the army. He has been married 28 years, and has two daughters. The only language he knows is Russian.

PARENTS LOVE HIM

Kindergartens were founded in Germany by Friedrich Froehle, who regarded children as plants requiring constant attention.

Savings Deposits

\$4,558,613,000

OTTAWA, Aug. 8 (CP) — Savings on deposit in Canada's chartered banks at June 30 last amounted to \$4,558,613,000, against \$4,582,765,000 at May 31 and \$4,538,193,000 at June 30, 1950, the chartered bank statement for June showed today.

Call loans in Canada amounted to \$82,211,000 at June 30, as against \$2,371,000 at May 31 and \$11,781,000 at June 30, 1950.

ST. PETERSBURG, Fla.

Acheson Warns Aid Cut Would Hit Asia Program Relieves Constipation Trouble!

WASHINGTON, Aug. 8 (INS) — Communist pressure on southeast Asia is "likely to increase in the next year."

Secretary of State Dean Acheson today warned that a proposed \$700,000,000 slash in foreign aid would lengthen the period of serious war risk in Europe and materially hamper efforts to check Communism in Asia.

Acheson made his statement in a letter to Chairman Richards

of the Senate Foreign Affairs Committee, who suggested the council of London's Wood Green district recently became the first local council in Britain to admit the public to its committee meetings.

The secretary declared: "The longer that situations of great military-political and economic weakness prevail in various areas of the free world, the longer will we face the risk that Soviet exploitation of these situations will precipitate a third world war."

Earlier, it was revealed that the administration has proposed a new \$307,000,000 aid program for Nationalist China and Senator Byrd, (D., Va.), said the plan could lead to full-scale war with the Chinese Reds.

Other foreign developments:

Chairman Connally (D., Tex.) said the joint Senate committee was told today by a Marshall Plan official that Chinese Com-

Propaganda Won't Reverse

ONE of the oldest devices on record among human kind is the setting up of a straw man only to knock him down again. That seems to be the reason behind this sudden burst of generosity on the part of the Soviet Union in publishing verbatim the statements of western statesmen. Thus there was in *Pravda* Mr. Morrison's statement in 1,500 words, and the Soviet rebuttal in 2,500 words. Then followed the text of the Truman letter to Congress commanding a resolution of friendship for the Soviet peoples, and with it the text of President Shevchenko's five-power pact proposal; both capped by a simultaneous counter-blast from *Izvestia* relative to the forces of "international reaction"—with repeated signs of confusing and deceiving the people. So what *Pravda* sets up *Izvestia* knocks down, and Russians can take their pick.

The frank inquiry of the United States state department as to why Russia has not lived up to her obligations under the United Nations Charter is not likely to find a place in either *Pravda* or *Izvestia*, for obvious reasons. The whole manoeuvre on the part of the Kremlin has been as artful as any of Hitler's techniques when he was pro-

pounding the doctrine of the big lie. Let it only be large enough, said he, and everybody would believe it. Thus, when Russia comes to dealing with these exchanges, high-mindedly aimed at "the truth" and "peace," she will have chapter and verse to support the contention that her peaceful efforts failed by reason of the warmongering attitude of the West. To what extent that will be credited behind the iron curtain remains to be seen.

The crux of the matter is that propaganda will not reverse. Having spent the last five years in an intensive campaign aimed at depicting the Politburo as the only peacemaking body, and all others as warmongers, liars and worse, Soviet Russia cannot now afford to concede that there is any honest desire for peace outside of the iron curtain. So this recent exchange of seeming frankness is in itself the straw man, which the Kremlin in due course will proceed to knock down. Naively enough the knocking-down process appears concurrently with the setting-up of the dummy, much like the net that is spread in sight of the fowler; but then it requires practice even to propagate a big lie.

Underground Wiring Shelved

IT MAY occur to the city after mature reflection that it has agreed rather too quickly with the B.C.E.R. Company, Ltd., that nothing can be done to rid Victoria of the unsightly—and from a fire prevention standpoint unsafe—tangles of overhead wires that obstruct so much of the downtown business section. No one had suggested that the elimination of aerial cables could be achieved in a year, nor even that the present time was a likely one for a major attack on the problem. It is far cry from that, however, to the point of saying that nothing can or will be done and that the city council can now forget comfortably about the whole matter. In point of fact, some progressive Canadian cities have already eliminated overhead wiring, while

others have laid down a long-term program to do so.

Even taking the figures produced by the company as the initially estimated cost of a similar program in Victoria, placed between \$12,000,000 and \$14,000,000, and spreading them over a long range period and the project is not so formidable. It is reasonable to suppose that the company would be willing to bear its own share of the costs, in self interest. The city would need to help where a community result was desired. Even the province could be persuaded that here was a plan with some bearing on the development of the capital city of British Columbia. To say, however, that nothing will be done is another matter. The city council has the right to curb further accretions to the overhead network, and certainly should do so.

Rewriting History

PRIME MINISTER ST. LAURENT intends to rewrite Canadian history. He is reported as saying this week at Battleford, where in 1885 the residents of that Saskatchewan valley were besieged by the half-breed forces of Louis Riel, that he will take official steps to have the North West Rebellions declared to be not rebellions but merely uprisings. The half-breeds, he says, were seeking responsible government and not fighting against law and order.

As regards the first rebellion, that of the Metis at Fort Garry in 1869-70, even though it involved a murder that set English-speaking Canada aflame, Mr. St. Laurent is probably correct. The assumption by the crown of sovereignty over the vast unorganized Canadian west caused the French half-breeds to fear for their lands, and their protests were an assertion of their basic rights, unfairly ignored. Riel's second rebellion, however, was another matter.

Here again the half-breeds had legitimate grievances, but in 1885 responsible government control had been in operation for more than a decade. Riel's revolt was undoubtedly an attack on law and order. It caused the Fort Garry massacre of white residents; it resulted in pitched battles with the Canadian militia and numerous casualties; it saw the setting up of a rebel government. A rebellion it certainly was.

The hanging of Riel, perhaps none too wise politically, inflamed Quebec just as the murder of Orangeman Scott at Fort Garry had roused Ontario 15 years before. Riel was a French half-breed, and the revolts he led served to deepen the cleavage between the two racial halves of Canada. One wonders if this now-old place of history still rankles in Mr. St. Laurent's mind; for it was a Conservative and English-speaking prime minister who sent Louis Riel to the gallows.

Readers' Forum

Letters to the editor on any topic of genuine interest are welcome if they are brief, accurate and fair. No letter will be inserted in whole, or in part, except over the proper signature and address of the writer. Confidential correspondence cannot be returned.

ESQUIMALT CONVENTION

Sir.—Why were the total number of votes obtained at the nomination meeting on August 2 at Esquimalt for each candidate not given out immediately after they were counted? And why did not all voters at that nomination want to know why?

What is wrong with the Esquimalt people that they stand for such unfair and unbusinesslike matters as that?

(MRS.) ADELAIDE MARSHALL,

Cook Street, Victoria, B.C.

ARCHITECTURE

Sir.—There has been so much "unwarranted criticism" of the zig-zag fence in the Uplands, and the house which it conceals from the public gaze, that it is time someone criticized the critics. It is difficult to condone the chorus from these self-appointed critics who find fault with something because it is unfamiliar and beyond their comprehension.

It is poor training indeed which prompts people to impose their questionable and uncollected opinions on others in matters of this kind. Genuine artistic training does not produce an intolerant approach to any subject, least of all architecture.

It might interest these critics to know that the architect who designed this house is an outstanding man in his profession and one whose work has achieved national recognition. Like many architects today he believes in an honest and straightforward use of materials, employing natural wood, stone and glass instead of half timbering, false beams and leaded lights. This trend is evident today throughout the world, even in the artistic centres of Europe.

I certainly do not condemn traditional architecture of which there are many fine examples in Victoria. I speak as a contractor who has built many traditional houses, and who lives in a traditional house of modest but authentic design. Traditional architecture definitely has beauty and, superficially at least, much to recommend it. But I do condemn those who fail to

find any beauty in the functional use of glass, stone and natural wood. Certainly natural cedar, mellowed and weathered, has a unique character and beauty all of its own. To condemn a fence of this nature before it has had time to weather, and before it is softened with landscaping or base planting is rather stupid. It is even more stupid to expect that the ideal type of home for the Uplands area should be patterned after an English manor house.

G. H. WHEATON,
1217 Wharf Street, Victoria, B.C.

POLICE DRIVING TESTS

Sir.—I for one believe that novel suggestion made by Mr. Mitchell and reported recently in The Colonist carries a lot of merit. One or two hours of driving in the city streets by a citizen could do a lot of good, not only as a blow against a person's ego, but there are few people who know all the laws and that period under supervision wouldn't harm anyone and possibly do a lot of good.

While the officer was with the man in question it would give him also a chance to check other bad drivers and an enlightening note might be sent to him through the mail.

The fact that the wages of the extra man, would come out of the pockets of the person fined should appeal to the city purse-string pullers. I would like to see this idea given a good trial.

KEN CAMPBELL,
3388 Quadra Street, Victoria, B.C.

Thinking Aloud

"...of shoes and ships and sealing wax—of cabbages and kings."

By TOM TAYLOR

THE bomb doors opened and from the U.S. plane flying high over Hiroshima there dropped—flowers. It was 1951, not 1945.

Six years made the difference between an atom bomb and a floral wreath.

The gesture, perhaps, would be appreciated by the thousands of Japanese gathered to remember the estimated 100,000 persons who in a brief hour or two perished on that fateful August day.

Perhaps not.

Nevertheless the thought behind the act had a touch of grace. Goering never repented the blitz of Coventry, of Hull, of London, nor sent a Messerschmidt afterwards to drop a note of regret. Neither did the people of Hamburg, of course, ever see an Allied plane overhead on the same kind of mission.

The war was still on and it takes the calmness of peace, if so today can be assessed, to cool the temper and substitute ruth for anger.

★ ★ ★

The years, always, make a difference.

A British admiral died the other day. He was the captain of the warship Valiant when it took part in the Battle of Matapan in 1941. That same year his ship was badly damaged by a daring human torpedo while it lay at anchor at Alexandria.

Three years later he was at Taranto. Italy had thrown up the sponge and joined the Allied side, and the captain was asked to attend a local ceremony at which awards for bravery were to be given to Italian officers. One of the recipients was a young lieutenant and his deed—crippling the Valiant!

There was irony, but perhaps grace also, in the invitation extended to the British captain to hand the Italian decoration granted him for this achievement.

He did so.

Here again the hard impact of war had faded, so that gentler emotions could hold sway and old sores, if not entirely forgotten, at least laid aside.

★ ★ ★

So, in a different fashion, it was this week at Hiroshima.

The floral wreath that dropped from the sky was not an amend—how could it be? More people died on that fateful August day in 1945 than the U.N. has lost in known-war dead in the whole Korean campaign.

But it was an expression of regret, no doubt sincere, that what happened had to happen.

We assume, of course, that it had to happen. As it turned out the war with Japan could have been won without the atom bomb; but that is the view of hindsight, and 100,000 people might still have died, although on the opposite side.

It is true also, I suppose, that the atom bomb would still have been made, if not by us then by someone else.

The race for destruction now current throughout the world would not have been avoided because there was no Hiroshima. Once the atom was split atomic piles became inevitable.

Nevertheless I'm sorry it was the Allies who felt impelled to drop the first one. Perhaps compunction was implicit in the floral emblem dropped humbly the other day. I hope so.

Gerald Waring

Reporting From Ottawa

If you knew your way around Ottawa's staid and stuffy Chateau Laurier, almost any night you might hear the jargon of stud or draw or gin emanating from behind one of several closed doors.

Chances it would be the door of a room registered in a name which, in the industrial life of Canada, carries considerable weight. For the Chateau is where the country's new dollar-a-year men live and stud, draw and gin are their main relaxations after long days in hot offices trying to get the bugs out of Canada's defense production program.

Actually the term "dollar-a-year man" is a misnomer. It's an Americanism which crept into our vocabularies in Second World War, when United States business men who gave their services to the government at Washington were really paid a buck per annum.

But our dollar-a-year men don't draw even a dollar a year from the government as salary, and didn't in the recent war. All they get are modest, civil service scale living expenses. And some won't even accept expenses—like J. M. Cochrane, director of mechanical transport for the Department of Defense Production, who is on loan to Ottawa from a vice-presidency of the Canadian General Electric.

Then there's Crawford Gordon, Jr., president of English Electric of Canada, and vice-president of John Inglis who holds a top job as production co-ordinator; electronics director A. H. Zimmerman, who came from the job of general production manager of the Moore Corporation, and Stanley Marsland, who works under Zimmerman, and who's rated as one of the wealthiest private industrialists in the country.

At a guess, they average \$25,000 a year in private life. Yet the country gets their services for nothing.

The Perfect Secretary

(From The Fort William Times-Journal)

A REPRESENTATIVE of the National Employment Service told a meeting at Montreal recently he was puzzled by the reluctance of employers to hire qualified stenographers who were elderly.

He knew of several women who had years of experience in secretarial work who could not find work because of a mentality that existed in offices and it seemed impossible to change the attitude of employers in this respect.

This calls to mind the case of an office-manager in the early forties who had to fire his pretty stenographer because she became more interested in her boy friend than her work, which was being woefully neglected.

In the book of this employer, he had found the perfect secretary.

"Playing cards used in Venice in 1125," says a filler item, "contained 78 cards to a deck." By a curious coincidence that was how the shooting started on our western frontier.

It is true also, I suppose, that the atom bomb would still have been made, if not by us then by someone else.

The race for destruction now current throughout the world would not have been avoided because there was no Hiroshima. Once the atom was split atomic piles became inevitable.

Nevertheless I'm sorry it was the Allies who felt impelled to drop the first one. Perhaps compunction was implicit in the floral emblem dropped humbly the other day. I hope so.

FAUX PAS

I was discussing the general question of the future of the Bamangwato tribe with Ruth Seretse (English wife of the exiled chief, Seretse Khama) on the terrace of the House of Commons the other day at Tom Driberg's remarkable wedding reception. Seretse, Tshkedi, and a group of Africans were standing round when I said to her thoughtfully: "Of course, you are the real niggers in the wood-pile." An outrageous gaffe. Fortunately, Tshkedi, Seretse and their friends thought it funny.

The New Statesman and Nation

The Pack-sack

BY GREGORY CLARK

As a general rule, people wear an habitual expression on their faces that gives away their true nature. Stupid people look stupid; smart ones, look smart. No matter how hard a naturally surly person tries on a special occasion to be agreeable, his true disposition cannot be concealed, because years of surlyness have built into his countenance the tell-tale signs that anybody can read.

There is a particularly pleasant type of person who is always surprised and delighted. He is invariably delighted to see you, unfailingly astonished and interested in what you have to say. Such people develop the raised eyebrows and wrinkled forehead of pleased surprise and wear it perpetually.

Shrewd and watchful characters look that way even when listening to a joke or hearing sweet music. Impatient people acquire an expression of impatience that they can't dispense with even when dancing or eating a good meal.

In the Pullman car, the gentleman seated next to me was one of this type. He read the newspaper impatiently, glared impatiently out the window, twisted and fidgeted, and was filled with impatience at the thought that I, or the lady on the other side of him, might attempt to engage him in conversation. I don't know about the lady, but there was nothing I wanted less than to hear this gentleman's voice.

Finally he fell asleep in his chair, and even so relaxed, his face was a mask of impatience. When the porter woke him on our arriving in the terminal yards, the gentleman was furious—it seems he wanted to get off at a suburban station we had just left.

"Did you tell me, sir?" enquired the porter, kindly.

The unhappy soul barged down the aisle, muttering.

Sand Magic

WASHINGTON, D.C.—Starting new uses for glass are proving again the magic in a grain of sand.

Electrified glass that glows has been announced in terms of an entirely new form of lighting for homes of tomorrow.

Coffeemakers that heat themselves by conducting a current; photographs printed in three dimensions inside photosensitive glass; transparent mirrors; glass-filled sofa cushions supported by glass coil springs; window panes with built-in Venetian blinds; glass furniture, fishing rods and plumbing; glass tablecloths, neckties and curtains that frustrate moths and never rot—all these are found in homes of today, the National Geographic Society observes.

Innumerable ways glass enters more into modern life every day. Yet it is as old as the earth, its first use by man hidden in antiquity. Its substance is sand, its secret, fire.

Volcanic fires formed the most common glass in nature, obsidian. Stone Age men used this sharp-edged natural glass for arrowheads, knife blades and razors. More advanced cultures shaped jewelry, ceremonial masks and tools of many uses from it. Glass fibres, today's "miracle material" of industry, are equally old. Birds build their nests of them in the Hawaiian Islands where "Pele" is the legendary goddess of the mountain and "Pele's Hair" is thrown up by volcanic steam—hair-like filaments of glass, spun in the sky.

Man-made glass, its beginnings unknown, dates from long before the Pyramids. In Corning, N.Y., late in May, a new museum and library was opened to the public. It brings together the most ancient and most modern ways the world has been served by glass. Beside a tiny blue Egyptian vase shaped nearly 4,000 years ago stands a duplicate of the great 200-inch Hale telescope disc cast for Mount Palomar Observatory in California—the largest piece of glass ever made by man.

World News In Review

(From AP, CP, INS, Reuters)

Chiang Kai-shek, biding his time on Formosa in hope of eventually returning to the Chinese mainland, may get a big helping hand from the U.S.

Senate sources in Washington said yesterday President Truman has asked for \$217,000,000 in military aid and \$90,000,000 in economic assistance for the Nationalists.

But the President insists that there be aggressive U.S. administration of the money so the American taxpayer will know what he's getting for his money.

Crises

Newspapers in Cairo said Egypt's cabinet is in turmoil because of foreign minister Salah el Din Pasha's statement that Egypt will break off her treaty with Britain. The statement apparently astounded premier Mustapha el Nafas Pasha and most of his cabinet.

The Iranian oil crisis seems almost over. British and Iranian delegates met in Tehran and reported some progress after two hours of talk.

Weapons

An Ottawa dispatch indicates that Canada's atomic scientists who have been working on peacetime application of atomic power, have turned to war work.

U.S. delegates at United Nations, N.Y., last night made public a proposal for lumping all prospects for arms control including atomic weapons, under one commission. The principle is accepted by most U.N. members, including the Soviet bloc.

A Los Angeles meteorologist declared that rainmakers have given the U.S. a more deadly weapon than the atom bomb. He said clouds could be seeded with radioactive particles to produce "hot" showers over enemy positions.

The Reds

Chinese Nationalist sources in Taipei reported the Russians have been increasing troop movements into Manchuria since mid-July.

British philosopher Bertrand Russell said in London that the only white men who can wield any real influence in Asia are the Russians. "I don't think we have a chance," he gloomed.

The Seaway

An attempt to attach the controversial St. Lawrence seaway project to the \$8,500,000,000 foreign aid bill failed in Washington. The bill came before the house of representatives foreign affairs committee.

Speaking at Ironsides, Que., national C.C.F. leader M. J. Coldwell said Washington lobbyists have blocked the passage of the seaway measure, to the detriment of the national interests of both Canada and the U.S.

Medicine

Doctors in Ste. Agathe des Monts, Que., reported spectacular success in treatment of pulmonary tuberculosis with two new drugs streptomycin and para-aminosalicylic acid.

Norway's Lieut.-Gen. Carl Boye Semb said in Washington the U.S. medical service has achieved results in Korea "far better than in any previous war."

Mrs. Dorothy Mae Stevens, 23, who last winter was literally frozen stiff, yesterday left Michael Reese Hospital in Chicago for a convalescent home.

Broken Valve Spews Water Over Highway

A broken air valve spewed a 200-foot geyser of water into the air over Craigflower Road yesterday morning from the main feeding downtown Victoria, Esquimalt and Oak Bay.

About 175 gallons of water a minute poured out of the broken pipe, apparently damaged by grading work being done between Tillicum Road and the Esquimalt boundary.

The valve first began leaking Tuesday night but the flow was checked until yesterday when pumps raised the pressure to nearly 150 pounds and the valve blew out with a roar.

Water board foreman Don Mather said the valve hole was plugged without shutting off the main which would have deprived a large part of the downtown business district of water.

Traffic continued through the spray and only one car stalled on the muddy road.

Doble Report Seen Settling Parking Issue

A report from traffic surveyor Robert Doble might decide whether parking meter space could be set aside for tourists during summer months, Alderman Waldo Skillings said yesterday.

The alderman said he still couldn't go along with any such proposal. It would be unfair to Victoria motorists and to parking lots and garages, he said.

Proposal was made by G. T. Edgeland, chairman of the tourist section, Chamber of Commerce, who said the courtesy would be appreciated, although meter charges still would remain in effect.

Infanticide Case

Woman to Be Committed To Higher Court Today

Jean Pearson, 25, of Cadboro Bay, charged with infanticide, will be committed for trial in a higher court at 10 a.m. today.

Lawyer Ronald Grant asked official "committal" be delayed until today to fix bail. The

request came after a two-hour preliminary hearing in city police court yesterday.

Accused is charged in connection with the death of a newly-born baby found in a downtown hotel room July 15.

Mr. Grant told the court that accused was the mother of the child, after lengthy evidence by police. Dr. J. H. Moore, who conducted a post mortem on the baby, and Dr. E. L. McNeven,

Prosecutor C. L. Harrison

spoke to his wife and said, "I am not going to have my learned friend shouting in this court room."

ARRESTED JULY 19

Detective Louis Callan said that in company with Detective Angus Munro, he arrested the accused in a Douglas Street laundry on July 19.

"She started crying and then made a statement. She said she visited the hotel, had a baby and then passed out. When she came to she put her hand on the baby and it was cold," Detective Callan said.

The child died from asphyxia. There was no evidence of external suffocation," Dr. Moore testified.

Dr. McNeven gave evidence that the baby had been alive

when he was born.

REMOVED TO HOSPITAL

Removals will include a

moderately priced aluminum and glass

doorway on Blanshard; a long

multi-position desk on the first

floor which is designed to speed

up the circulation of books; an

elevator for the public and one

for the staff; intercommunication

system linking all departments;

enlarged film department with

a screening room; and a music

room.

REMOVED TO HOSPITAL

Birdie Watches Photographers

Procedure was reversed last night as the birdie watched photographers Herbert Addington, Vancouver; Paul Johnson, John Price, both of Victoria, and Jack Cash, Vancouver. Johnson and Price were installed as chairman and vice-chairman respectively, Victoria "zone" of Professional Photographers' Association

of B.C. Eighteen-local photographers received membership certificates from the association president, Mr. Johnson. Provincial body will seek legislation governing ethics and attempt to prevent soliciting by transient photographers without credentials. (Colonist photo by Jim Ryan.)

Air Force Joins Hunt For Anglers

Witchcraft Holds Sway In Hinterland of Italy

ROME, Aug. 8 (Reuters).—Black magic casts a power spell in some parts of Italy.

In some Italian "backwoods" villages the most important man is the local "magician"—more feared than the carabinieri, more respected than the smugistrate, more revered than the priest.

A recent trial brought to light black magic practices and superstitions 1,000 years old.

At the trial a youth was sentenced to 15 years in jail for murdering an aunt he thought had put the "evil eye" on his family.

The defendant, Armando Antonetti, said a magician had told him his family was "bewitched" and prescribed this cure:

BOIL DIRTY CLOTHING

"Fill a cauldron with water. Set it to boil. Fill it with dirty one foot only.

Clothing. Switch off the light. Beat the clothing with sticks. Whosoever put the evil eye on your family will knock on your door."

According to witnesses the aunt, 65-year-old Quintilla Croce, entered as the family performed the rite.

The power was self-styled magician Constantino Di Girolamo. He was charged with instigation to murder but was acquitted for lack of evidence.

He dominated the stuffy old courtroom. Witnesses glanced fearfully over their shoulders as they gave evidence and stood on one foot while being sworn.

The magistrate found out that according to a local superstition, a witness was not obliged to tell the whole truth if he swore on one foot.

The magistrate found out that according to a local superstition, a witness was not obliged to tell the whole truth if he swore on one foot.

The plane was reported six days overdue on a 296 mile flight from La Lo Roche to Stoney Rapids in Northern Saskatchewan.

Aboard the plane were Dr. John Tasche of Sheboygan, Wis., pilot, and Miles Eichenberger of Plymouth, Wis., passenger. They left Sheboygan July 29 for a 10-day to two-week fishing trip in Saskatchewan.

About 4 per cent of all milk is lactose, an easily-digestible form of sugar.

Unified Korea Held U.N. Aim

FLUSHING MEADOW, N.Y.—The United Nations' Korean reconstruction chief declared today he believes the political unification of the Korean nation still remains the U.N. objective.

J. Donald Kingsley, agent general of the U.N. Korean Reconstruction Agency, told a news conference there is "no longer" a question of uniting an industrial North Korea with an agricultural South Korea.

He said Allied air power has leveled North Korean industrial might and that the entire nation

must "begin from scratch" to rehabilitate itself economically.

HUGE DAMAGE

Back recently from Korea where he concluded agreements with the unified command of the war-torn country's reconstruction, Kingsley estimated the war damage at \$2,900,000,000.

In contrast, he said, his agency has only \$7,000,000 with which to begin relief and rehabilitation once hostilities cease. He added,

however, that he has \$2,000,000 in pledges from the United States and other countries.

Kingsley, who also heads the

international refugee organization, stressed that Korean reconstruction must be a "real job," pointing out that the Asiatic world is watching U.N. conduct in Korea closely.

Mincing no words, he termed Korea the "West Berlin of the Far East" and the "advance salient against Communism in the Far East."

WINGED TERROR

NORTH BAY, Ont. (CP)—A chicken hawk which swooped down on a farm near here killed 29 chickens without touching them. The chickens crowded into a corner of their coop trying to escape the invader and were smothered to death.

lb. 65c

SAFEWAY

We liked a phrase one of our customers used last week. She said she shops at Safeway because she gets "Bargains by the basketful." Her remark sums up our pricing policy in a nutshell. You see, we set every price right down at rock bottom. This means that everything you buy at Safeway is an honest-to-goodness value! Start today to make each basket of foods you buy a "Basketful of bargains." It will help plenty if you've been having budget blues.

Miscellaneous

Mild Cheese Brixton, Cheddar

Medium Cheese Brixton, Cheddar

The Sports Grill

By PAT ROBINSON

We have been knocking around the U.S. Military Academy for several days now trying to get the facts on the current cribbing scandal involving some 90 cadets, many of whom are football stars.

We have talked to all ranks—from buck privates in the regular army to the commanding general—and to many of the saints as well as the self-confessed sinners among the cadets.

It is a brand-new pie who has been undergoing his first week of basic training. For obvious reasons we cannot disclose his identity. We think you will find his reactions as interesting as we did. Here they are:

"This mess wasn't a shock to me because I realize that a little cheating in examinations probably has been going on since Socrates sat on a rock and taught young fellows the facts of life.

"But I admit it was a surprise only because of the famous West Point code of honor which I had been told was never violated. I know better now."

"I think the code of honor is a wonderful thing in itself, but the system under which it operates simply begs to be violated. For instance, when you give 200 men an exam today, then ask another 200 to take the same exam the next day, it is only natural, perhaps, for some weak sisters to pass on the questions from the first exam to those about to take the second test."

"That I can understand, even if I can't condone it, but what I can't understand is the statement of a few of the self-confessed crooks that they placed friendship above honor."

"It is evident that they were willing to forget one of the three words in the academy's motto, 'Duty, honor, country.'

"They remind me of the Secretary of State Dean Acheson, who said he would not turn his back on Alger Hiss. With examples of such laxity in the highest offices of the land, it is not surprising that young men should grow cynical and follow a bad example."

"I came to West Point and I hope to play football. But that is not my main objective. I love the army-life and intend to follow it as a career."

"And I certainly am not going to let a little cribbing break down my morale."

"I think the army, like many other colleges, puts too much stress on football. And the football crooks, even the smartest of them, admit the game took up so much of their time they hadn't enough time left for their studies. With their example before me, it would be a choice between keeping up with my classes or staying on the gridiron. I'm going to give up football."

Non-Qualifiers in Derby To Get Chance at Sedan

Some who failed to qualify for one of the 350 rungs on the Victoria-Saanich Inlet Anglers Association ladder Derby fish-off for the \$2,700 new sedan may still be able to compete.

Association officials were told at a special meeting Tuesday that between 35 and 40 of those who had qualified had failed to purchase their final tickets before the deadline time of 5:30 p.m. Tuesday.

Officials announced that the vacant rungs would be filled by those who weighed in the largest salmon throughout the contest but failed to make the master ladder.

CLIMAX, SUNDAY

Climax of the 10-week salmon Derby will be staged at Saanich Inlet this Sunday, from 6 a.m. to 4 p.m.

Fish must be weighed in at Hall's Boathouse, Goldstream, or at Harry Peard's Anchorage Boathouse at Brentwood, before the closing time. The derby who weighs in largest salmon will be presented with the car at Anchorage at 5:30.

Andy Spouse and Art Worth will operate the weighing in at the Anchorage and Ron Morley will officiate at the weighing in at Hall's.

Officials stated at the meeting that the inlet would be heavily patrolled to safeguard against violation of any of the regulations set down by the association.

Officials on federal fisheries

boats will co-operate with the association to guard against any foul play in the fish-off.

Qualified derbyists may have non-entrants on their boats but only one line will be permitted per boat for each contestant.

Many lines, will disqualify all contestants on the boat.

Entrants will not be allowed to use live bait but herring strip will be permitted.

Only Wells Boathouse at Brentwood and Holder's at Deep Cove are reported to have boats available for the fish-off.

Soldiers Win Senior Title, Beat Fuelmen

119 Battery captured the city senior "C" men's softball championship by defeating Island Fuel, 9-6, at Work Point Barracks on Saturday.

The victory gave the soldiers the best of three final series in straight games. They won the first game earlier in the week, 8-5.

Larry Behardh hurled the win for 119 Battery, limiting the Fuelmen to six hits.

Overtime Decision For Men in Woods Set for Next Week

A decision on whether loggers will work overtime when the forest ban is lifted may be known next week.

The decision is expected from an executive meeting of International Woodworkers of America (C.I.O.C.L.C.) at Vancouver next Thursday and Friday, a union official said yesterday.

A meeting earlier this week between district officers and lumber operators failed to lead to any policy announcement.

The operators have asked 32 days to work overtime at time of the ban to pay rates if they are unable to receive set rates. It is not expected to be granted.

DEALS BY MONTH'S OUTPUT

A Victoria lumber dealer said yesterday that an early warning of a lumber limitation log supplies combined with possible defense contracts pending over might result in days of lumber shortages for domestic requirements.

It also could cause timber prices to rise, he said.

Certain grades and species, such as fir, could easily be in short supply soon. Mills may be forced to turn to imports of other species.

Victoria mill operators have not yet reported overtime work weeks of shortages as raw operators of some timbers and Vancouver mills.

Police Investigate Arson Possibility

A VICTORIAN may have been responsible for a fire on the south side of Mount Newton early this week.

Local Saanich police chief Vernon Lawley said he was investigating the possibility that the fire was deliberately set.

Pension Requests Continue Heavy

AROUND TOWN

Applications for the new federal government old-age pension continue to pour in at more than 1,000 a day here, officials of the Department of Health and Welfare, Old-Age Security Branch, said yesterday.

More than 2,500 people sent in forms last Monday and 1,400 Tuesday. Up to last Friday, 3,000 had applied since Aug. 1, when applications were first accepted.

The total to date is about 7,000, exceeding Wednesdays figures which had not been compiled late yesterday.

Persons of \$30 a month will be paid to all persons over 70 years of age under the new plan. Payments will begin next year.

It is estimated that 40,000 persons in B.C. over 70 are not receiving pensions.

SELL 13 LOTS

A total of 13 lots from two subdivisions in the Carnarvon Park area have been sold. Oak Bay municipal officials reported yesterday.

The municipality recently offered 60 lots on the new development, created after demolition of Willows Fair grounds buildings. Northern boundary is south Lansdowne, with through roads to Esquimalt Bay Road.

Numerous inquiries about the lots have been received by the municipality.

SELL SUBMIT BRIEFS

International Brotherhood of Electrical Workers, AFL, I.L.E., has been asked to submit a brief to the Intercollegiate and Arbitration Arbitration business section. A Park said yesterday.

PROTEST DUMPING

Residents of Queen Avenue and Spruce Road are protesting the dumping of rock and fill on city-owned lots in the vicinity.

In a petition filed at City Hall yesterday, 17 residents complain

Water Shortage Felt on Galiano

GALIANO ISLAND

Aug. 8

A water shortage threatens residents of Galiano Island.

Many residents whose wells are now low supply because of the extended drought are having their supplies cut off from more fortunate neighbors who are not immediately threatened, a resident said.

The drought has turned most gardens into arid, compacted lawns for the first time in 30 years.

Residents are given residents and visitors that it is illegal to go off the highway into bushland during the fire hazard, including the 300-acre public park.

Local residents expressed hope that the gypsum plant in the vicinity of Kilometre 10 will be capable of an annual output of 85,000 tons of aluminum ingot at the end of its first stage of development in 1954. In the meantime, the company will guide development of Kilometre 10's gypsum valley, will build houses of their own and merchants there own shops.

Alcan's president expressed hope that the gypsum plant in the vicinity of Kilometre 10 will be capable of an annual output of 85,000 tons of aluminum ingot at the end of its first stage of development in 1954. Vary Dressings

Here are two new dressings to give a tasty twist to your salads.

VEGETABLE DRESSING

2 eggs
1 cup sour cream
1/2 teaspoon sugar
1/4 teaspoon dry mustard
2 tablespoons salad oil
1/8 teaspoon vinegar
few drops Worcestershire sauce

Beat eggs until very light. Add sour cream, salt, dry mustard, sugar, vinegar and Worcester sauce. Blend well. Cook over hot water, stirring constantly until mixture is smooth and slightly thickened. While still warm pour dressing over your favorite salad greens and serve immediately. Yield: 1/2 cup when it is sufficient for a tossed salad to serve six.

TOSSLED DRESSING

3 slices bacon
1 tablespoon finely chopped onion
1 teaspoon flour
2 tablespoons brown sugar
1/4 teaspoon salt
1/4 cup water
1/4 cup cider vinegar

Cut bacon in small pieces and cook until crisp. Add onion and cook a minute or two. Blend in flour, sugar and salt. Add water and vinegar and cook stirring constantly until mixture is smooth and slightly thickened. While still warm pour dressing over your favorite salad greens and serve immediately. Yield: 1/2 cup when it is sufficient for a tossed salad to serve six.

THE BEEHIVE—618 Fort

But you've never thought of

serving oranges out this way: a novel and quick-as-a-wink salad with lots of appetite and eye appeal. Add to its virtues the refreshing taste of a citrus salad, or as a dessert, the flavor of orange juice and fruit supreme with strawberry slices and shredded coconut.

This salad may look complicated but it's really easy to prepare. The secret is to cut the oranges into 8-shaped slices. However, do not cut all the way through the oranges; leave enough meat so that the orange will hold together on the plate. Place the orange on a bed of shredded coconut and strawberries. Sprinkle coconut on top and have a stirring salad that is very, very good after a short time in the refrigerator.

For a low transfer, go to

the store. If you like to make

your own, the pattern is \$1.25.

SALMON TOMATO BOUQUET

Six medium tomatoes, 2 cups (1 lb.) canned salmon, 2 hard-cooked eggs, chopped, 7 thin green pepper strips, 1 lettuce leaf, 3 cups potato salad.

Smooth and Mellow Dessert

There's something about the flavor of lemon that's so good as a dessert topping. To follow the old saying, here are some new ideas for desserts and in salads too.

This lemon cream takes new pleasure from the old saying, "You can't have a lemon without a lime."

Hobby Centre Suggested At Prince Robert House

Prince Robert House has been suggested as a hobby workshop for elderly people.

Clarence F. Allen, 309 Michigan Street, said he received the suggestion in a letter after stating he would be willing to sell the cornea of one of his eyes to raise money.

About 10 corneas have been received, all in favor of a hobby centre, but against sale of his eye, he said.

He will forward the suggestion to the city, Mr. Allen said.

CRYING NEED

There is a crying need for a hobby workshop where elderly persons may congregate and work. I'm ready to sell one of my eyes for that purpose."

He thought someone may be interested in buying the eye for a blind soldier wounded in Korea.

Price of the cornea would be about \$10,000, he said.

"The eye is in good condition."

Brother Missing Since June 17

Funeral Rites Monday For Drowned City Youth

Funeral services for Arthur George Bishop, whose body was recovered Tuesday from Clue Lake near Prince George, where he was drowned October 1, 1950, will be held Monday.

Eighteen-year-old Bishop was drowned with three others in a boating accident at the lake. His younger brother, Lorne, 13, was been missing in the same area

since June 17 of this year after he left to go fishing.

Parents of the boys, Mr. and Mrs. Arthur George Bishop, live on Burnside Road. Arthur also survived by a sister, Mary Louise and a brother, Peter.

Services will be held Monday at 3:30 p.m. from the Memorial Chapel of Sands' Mortuary with Rev. W. E. Greenhalgh officiating. Cremation will follow at Royal Oak crematorium.

Less Food for Fido Best Plan in Summer

If "Fido" begs for titbits at supper-time or puts up a dog-sized clamor for an extra meal these days, he's best answered with a firm "No."

In fact, it would probably be much better in most cases if he had his daily rations cut down.

That's the advice of local veterinarians for dealing with man's best friend during the summer. Hot weather makes dogs less active and they don't

need as much food to keep up their body temperature. Both factors decrease the daily calory need of the animal.

Too large a food intake shows up during the summer mostly in an outbreak of skin diseases, caused by elimination of excess body heat through the skin. Clipping dogs will help but serving smaller portions of food is still the best cure.

NOSE IN CANADA

Rabbits are also plagued by warm weather, but strict incorporation laws have entirely eliminated the disease in Canada.

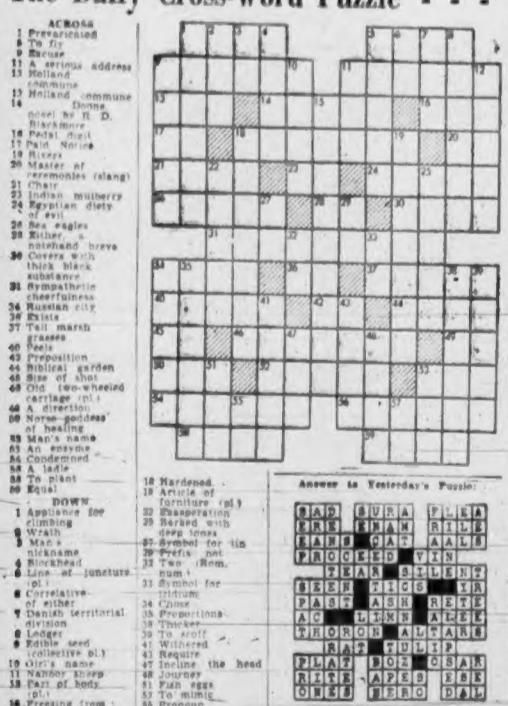

Other suggestions for hot weather care of dogs include keeping fresh water readily available and never, under any circumstances, leaving the dog locked up in an airless car parked in the sun.

The last two suggestions also hold true for cats, but otherwise the felines can take care of themselves.

DOLLAR EXCHANGE

RIO DE JANEIRO (CP)—Recent government surveys here include the announcement that Brazil bought farm machinery worth \$1,385,000 from Canada last year, an increase of nearly 100 per cent over the 1949 level.

E. P. Choiniere To Be Buried At Royal Oak

Requiem Mass will be sung tomorrow for Eli Peter Choiniere, 16 Lotus Avenue.

Mr. Choiniere came here 10 months ago from Winnipeg. He was agency manager for an adding machine company for 30 years, retiring in 1945. During his residence in Winnipeg he

Club and past president of the Winnipeg-Canadian Club.

He was born in Quebec province.

Surviving are one son, Eli P. in Victoria, one daughter, Mrs. M. Whalley of Edmonton, and also three grandchildren. His wife predeceased him in 1945.

Requiem Mass will be sung at Queen of Peace Church. Interment will follow at Royal Oak Burial Park.

Working with only one eye would be a pleasure, according to Clarence F. Allen, Victoria bookkeeper, who has offered to sell the cornea of his right eye to set up a hobby workshop for old people. No one has offered to buy the eye yet, but Mr. Allen is practicing anyway.

No Let-Up Sighted In Rainless Weather

It's the same old story told by the weatherman today.

No let-up is in sight in rainless weather of the past 55 days. Only a few fox patches and low clouds will mar the morning skies and it will be clear by noon.

Temperatures will continue much the same for the east coast, varying from 68 to more than 80 in northern areas.

West coast districts can expect to enjoy light winds and a cooler 64-degree temperature.

The peacock now is bred chiefly for its plumes but at one time the bird was valued as a table delicacy.

"Racing With Time"

When the big hand slowly to & does point, I gotta get down, & sweep out this joint. And that's because Frank & Will are on their vacation . . . up at Parksville. Over a week, up there they've been, so I rest of us struggle to keep the place clean. At a quarter to 7 I fall out bed, "her" face is buried in her black curly head. I turn on the radio, a crooner does groan, "whaha time," she mumbles, then a stretch & a groan. She gropes for one slipper with her toe, her eyes still shut, her thinking low. I put on my shoe, then stare into space, both semi-conscious the clock we must race. Her toes

8th in a series to bring you the facts about your Hospital Insurance plan

WHAT IS THE FINANCIAL STORY OF B.C.H.I.S.?

Many people have asked this question because they rightly feel that a study of the financial picture of B.C.H.I.S. will help them to understand the financial problems which B.C.H.I.S. has experienced.

The money B.C.H.I.S. gets from premiums, plus that received from the Provincial Government, is used to pay the hospital bills of the people of B.C. Hospital bills are governed by the cost of running the hospitals. Therefore, the most important factor with regard to the premium rate is the cost of running the hospitals.

In the present year, the hospitals of B.C. estimated their costs would be as follows:

	% of total cost
Wages	64.1%
Drugs	5.4%
Medical and surgical supplies	5.4%
Dietary (food only)	10.6%
Building and equipment	8%
Other expenses	15.7%
TOTAL	100.0%

B.C. hospitals also receive money from visitors and tourists. Workmen's Compensation Board and other agencies, private rooms, co-insurance, etc., which this year is expected to total \$6,755,000, leaving \$18,389,000 of the total cost of hospital operation the responsibility of B.C.H.I.S. Therefore, the money paid out by B.C.H.I.S. this year will be distributed like this:

	% of total
B.C.H.I.S. payments to hospitals	92.1%
B.C.H.I.S. administration cost	7.9%
TOTAL	100.0%

This \$19,984,000 is the amount needed this year, and it will be obtained from the following sources:

	% of total
Premiums from citizens	66.6%
Municipal per diem (daily) grants	4.1%
Money obtained from Provincial Government which includes per diem grants, subsidy, social assistance premiums, other costs of hospitalizing social assistance cases, etc.	29.3%
TOTAL	100.0%

This then is the financial story of B.C.H.I.S. for the present year. These figures are the official estimates as presented to the Legislature at its last sitting. Naturally, final figures will not be known until the end of the present fiscal year.

These messages are being presented to give you the facts about your Hospital Insurance plan. Be sure to read them. They deal with your Hospital Insurance plan, a plan which has already paid over \$40,000,000 for more than 500,000 hospital cases, and is providing benefits for thousands more each month.

B.C. HOSPITAL INSURANCE SERVICE
YOUR PROTECTION AGAINST LARGE HOSPITAL BILLS.
